IT In-House Internship 2023

Project: Campus Event Management System

Problem Statement:
Build a Campus Event Management System to streamline the process of managing and displaying upcoming events. The system should have a secure admin registration and login, an option to add new events, and a display of all registered events in a tabular format.

Technology Stack:
- Frontend: HTML, CSS, Bootstrap
- Backend: PHP
- Database: MySQL
- Version Control: GitHub

Instructions:
1. Admin registration and login are essential for system access.
2. Once logged in, the admin can add new events with relevant details.
3. The system should display all registered events in a tabular format.
4. Employ MySQL for database storage.
5. Utilize GitHub for version control.

Deadline:
24th December 2023, 11:00 pm

Submission Guidelines:
- Participants must create a public GitHub repository for the project.
- Upload the entire project, including source code, database scripts, and any additional files.
- Create a video explanation (maximum 10 minutes) detailing the project's functionality, key features, and a demonstration of how to run it.
- Submit the GitHub repository link and the video explanation through the provided google form.

This project aims not only to enhance your technical skills but also to provide practical experience in collaborative development, version control, and project documentation. Your efforts will be recognized, and successful completion will be acknowledged with a certificate. Best of luck!
